SOMNI
SCIENTIFIC

SOMNI BAIN MANIFOLD

SAFETY:

- Pressure Manometer center mount for immediate visibility
- Popoff valve releases excess pressure at 2cm H2O while maintaining passive volume in the rebreathing bag
- Monitoring pressure during manual ventilation is critical in preventing barotrauma or inadequate ventilation, especially in small patients

  Standard anaesthesia systems do not incorporate this feature

SPECIFICATIONS

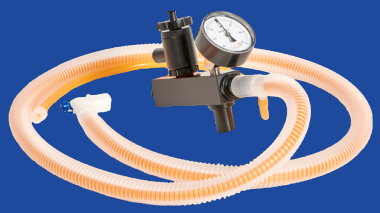
WEIGHT: 1.36 kg.

HEIGHT: 20.32 cm.

DEPTH: 19.05 cm.

WIDTH: 7.62 cm.

SOMNI Bain Nonrebreathing Assembly shown with RM-17003 Small Animal Rebreathing Anaesthesia Machine and VS-6001 SOMNI 3 Sevoflurane Vaporiser Funnel Fill 250 ML Capacity



CONVENIENT:

- Simple press and twist operation to anchor.
- Freely rotates on the base.
- Easy and quick to move when flipping the patient.

QUALITY:

- Manufactured from high quality, durable materials
- Adjustable manometer
- Space conscious
- Easily adapted to most breathing systems
